Referring to the Literal Translation of International Application PCT/EP2004/013739

In the Claims:

- 1 1. (Original) An automatic gearbox, for a motor vehicle, with
- infinitely-variable ratio, which may be operated in a
- constant speed mode, or an acceleration mode,
- 4 characterized in that
- the revolution speed in the acceleration mode can be
- 6 increased or reduced in steps.
- 1 2. (Original) An automatic gearbox according to claim 1,
- 2 characterized in that
- the revolution speed increase during an acceleration phase
- is at least in sections independent from the ratio.
- 1 3. (Original) An automatic gearbox according to claim 1,
- characterized in that
- the revolution speed during an acceleration phase can be
- 4 increased with approximately constant ratio.
- 1 4. (Original) An automatic gearbox according to claim 3,
- characterized in that
- after an acceleration phase subject to the position of the
- 4 acceleration pedal a further stepped revolution speed
- increase or a stepped revolution speed reduction can be
- 6 adjusted.

Claims 5 to 12 (Canceled).
